Bio-Forge™

Proven Consistent Performance, Multiple Application Choices

Bio-Forge Will Always Work - You Choose The Application Timing

Seed Treatment | In-Furrow | Foliar

University research demonstrates the power of **Bio-Forge** from StollerUSA to consistently reduce damage caused by plant stress. It keeps plant cells alive longer, significantly increasing marketable yield and profit.

Bio-Forge protects your plants and stimulates growth.

University	Treatment	Yield	Increase
Missouri	Control	203.7	-
	Seed Treatment (4oz/cwt)	221.9	18.2 bu/ac
North Carolina State	Control	191.7	-
	Seed Treatment (4oz/cwt)	206.7	15 bu/ac
Illinois	Control	169.3	-
	In-Furrow (1pt/ac)	183.3	14 bu/ac
Missouri	Control	191.7	-
	Foliar (1pt/ac)	215.1	23.4 bu/ac
North Carolina State (dry conditions)	Control	126.3	-
	Foliar (1pt/ac)	150.8	24.5 bu/ac

These yield increases were among the highest in our University research in recent years.

Application options that are both convenient and easy. Apply 1 pint per acre per year unless otherwise noted.

Corn Application Options:

- Seed treatment, 4oz/cwt
- In-furrow or with liquid starter fertilizer at planting at 1pt/acre -or-
- At the V4 to V7 stage at 1pt/acre before the need for special equipment -or-
- At the V11 stage: Bio-Forge mixes well with a late season chemical sprays
